The changes in Photoshop Elements 19.1 are more substantial than past versions of the software. It now offers new image editing tools to allow for image manipulation. The new tools include a new Masking feature to be more responsive to details, and the ability to adjust color and the brightness levels of your photos. You can also easily edit your photos and videos. It's also much easier to use than traditional software. Features of Photoshop Elements 19.1 You get many of the same features in Photoshop Elements as in Elements 18.1 for Mac and Windows. These include selective editing, layer controls, healing tools and other basic image editing features. You can edit most of the existing effects and tools, including adjustment layers. You also get a ton of amazing features like: Adjust color, brightness and contrast Adjust the lighting Add layers Replace an entire image with one you create Adjust your photos' size and shape Rotate your image Change the color of your photos Adjust levels of transparency Make GIFs out of your photos Create text on photos If you want to create new images using some of the other advanced tools in Photoshop Elements, then you may prefer Elements 18.1 or Photoshop Lightroom. What's New in Photoshop Elements? It may be easy to assume that new features should go hand in hand with new design, but it's not always that simple. Adobe added a ton of new features and tools in Photoshop Elements 19.1 that are impressive for any image editing software. Lighting The new feature of vector masks, or the ability to change the shape of your image with a selection tool, adds to the flexibility for image editing. You no longer have to use other image-editing software, like Adobe Lightroom, to be able to use advanced image-editing tools in Photoshop Elements. The ability to create a vector mask is a function of the vector layers in your photo. Using Photoshop Elements, you can enable the Vector Mask and edit your image in the standard PSD file. This increases the quality of your image editing. If you are using an older version of Photoshop Elements, you can create vector layers by going to the Layers tab of the image and click on the New Layer icon. You can also use the Layer Effects dialog to create a vector layer. In Photoshop Elements 19.1, you 05a79cecff

Two-photon autofluorescence imaging of the spinal cord in rats: a tool for functional imaging of glial cells? Two-photon microscopy of intrinsic fluorophores has recently been used to image individual cells in the central nervous system, with clearly visible microglia and astrocytes. Since these cells can be simultaneously activated and labelled, we hypothesized that the technique could be used to assess changes in function of glial cells in the spinal cord after nerve injury. We carried out spinal cord transection in rats and compared the motor behavior of these animals to a control group, using the treadmill method. We then used two-photon autofluorescence imaging of the spinal cord to identify the activated microglia and astrocytes. We found increased levels of pimonidazole, a marker of hypoxia, and GFAP, an astrocyte marker, in the spinal cord of transected animals. Microglia, identified by their typical morphology, were shown to be most fluorescent in the laminae I and II at the level of the lesion. Microglia were only increased at days 3 and 7 in transected animals, and were unchanged in the control group. These results indicate that the technique can be used to assess activated microglia in vivo. Glial cells are of interest in neuropathic pain, where we propose that they contribute to changes in function after nerve injury. Police are investigating after a man was badly beaten in Brampton. It happened around 4:30 p.m. on Tuesday, Dec. 3 in the area of Centennial Way and Lawrence Avenue, in the downtown Brampton area. Police say a man was with a woman at a gas station when a man approached the couple and began to converse. The man then allegedly punched the woman in the face. The suspect then fled the scene on foot and the victim sustained minor injuries to his face. It's unclear if there is a description of the suspect or what type of weapon was used. The injured woman was taken to hospital for treatment. Anyone with information is asked to contact police at 905-453-2121. As the new Congress prepares to enter the House chamber, there are plenty of big issues still to be resolved. One of them is whether or not to add to the \$700 billion financial bailout bill. House Republicans have promised to accept an increase in the

Effective luminescence properties of YAG/Tm³⁺/Tm³⁺ core/shell nanoparticles prepared by the coprecipitation method. Core-shell YAG/Tm(3+)/Tm(3+) was prepared by the coprecipitation method and characterized by X-ray diffraction (XRD), Fourier transform infrared spectroscopy (FT-IR), and photoluminescence spectra (PL). PL spectra indicate that core-shell nanoparticles exhibited strong red-emitting Tm(3+) ion emission. Compared with pure YAG:Tm(3+) nanoparticles, the luminescent properties of the core-shell nanoparticles are much enhanced. The strong red emission (501 nm) from Tm(3+) ions in YAG:Tm(3+) is transformed to stronger red-emitting Tm(3+) ions (543 nm) in YAG/Tm(3+)/Tm(3+) and then to a main red-emitting Tm(3+) ion (650 nm) in YAG/Tm(3+). The PL intensity of YAG/Tm(3+)/Tm(3+) decreases gradually with the increase in the amount of Tm(3+) ions, which suggests that Tm(3+) ions are partially blocked by the YAG core. The red-emitting Tm(3+) ions exhibit significant up-conversion luminescence, and a strong green luminescence in YAG/Tm(3+)/Tm(3+) is observed. The synergistic effects of YAG core and Tm(3+)/Tm(3+) shell show great potential application in YAG-based up-conversion nanoparticles. Usefulness of a Self-Rating Health Status Scale for Prediction of 6-Month Mortality in Elderly Patients with Chronic Heart Failure. The purpose of this study was to assess the usefulness of a self-rating health status scale for the prediction of 6-month mortality in patients with chronic heart failure. Self-rating health status was evaluated with the St. Mary's Short-Form Health Status Survey in 183 patients with chronic heart failure admitted to the hospital. We analyzed the relationship between these self-rating health status scores and 6-month survival rate. The patients were divided into two groups by the number of deaths in 6 months, and their analysis of covariance was used to assess the difference between
