The Windows version must remain installed at all times, as it will install the necessary Windows files as part of the installation process. If necessary, you can remove the device driver files and reinstall the driver (usually located C:\Program Files (x86)\Sega\Sports Interactive\Football Manager\Common\Win32) so that the game can load the correct files and all the functionality is back. That's it. If you plan to run other games on the PC at the same time, keep in mind that their software may conflict with Football Manager 2022. For instance, you may experience issues switching between games with user interface elements, or if you use the same keyboard when gaming and switching to FMs2022. This is why you shouldn't be using more than two devices to run multiple games at once. The Language Pack installs the langpacks folder from the FIFA Manager 2019 game. The langpacks folder must remain installed on your PC, as it is required to update Football Manager 2022. If you install the language pack for a different version of the game or another language pack, you can just delete the folder and start again.
