Besides the standard Single Player, the game also features a Multiplayer mode, where two players can compete at the same time. Playing a game is the same, but the player that is in charge of the camera will also be able to win special items, such as the Sportsmanship award or the Olympic Order, if they are able to get the ideal pictures, if they were able to complete the events in time, if they were able to use their environment to their advantage, etc. In addition, there will also be the Exhibition Mode and the Pause Menu. The game is the only 3D simulation sport game ever developed, including the 2012 Olympic Games themselves, and includes the most dynamic 3D Proportions, HD rendered environments, a full range of camera options and the most realistic Olympic commentary on the market. Through the use of a highly responsive controller, players will experience truly the Olympic spirit. The game also includes the new Olympics' Events, such as Beach Volleyball and Moto 3, the most popular Mixed Events in the Games. New gameplay mechanics are also included: if the player is ahead, he will be able to hinder the opponent, or if the player is in the lead he will be able to 'superbomb' the opponent and be awarded with a special bonus. In addition, the Visual Arts, the Inspirational Stories and the Training Mode will also be present. " London 2012 is a true achievement for any dedicated fan of the Olympics. The game is for the most part a complete package, with a wide range of Olympic events and a decent AI. Even its flaws, namely its inability to be played with a controller and its use of the same camera perspective across all events, are forgivable. 5ec8ef588b
