The application keeps your data in sync on multiple devices. It offers a great ease of use, especially for frequent file transfers. It's a free, cross-platform, secure alternative to cloud-based file synchronization. Sync 2.0 is a simple and powerful multi-platform application that keeps your files and folders in sync, all from a single window. It's extremely easy to

set up and manage, and it can easily connect to and synchronize with any folder across your Mac, Windows, Linux, and Android devices. All your folders and files are instantly synchronized and up-to-date across all your computers and mobile devices. You can quickly and easily access all your files from a single pane and perform operations on them using Resilio's intuitive controls and

unique ease of use. For those looking to quickly transfer data, Resilio Sync comes with a beautiful, intuitive interface and simple configuration options that make it easy to set up. Resilio Sync also supports integration with popular online services such as OneDrive, Dropbox, Google Drive, Box, and many more. There's no need to enter your user ID or password on every device. Why are people voting

for this app? There is no comparison. Resilio Sync is a no-brainer. Get it for free. If you want to get into sync and syncing, now is the time. There's really no excuse not to install this app. After playing around with both this and Dropbox, I think that this is the best file syncing app out there. Resilio Sync is simple to use and the most intuitive out of any of the services I have tried to date. My

favorite feature is the Sync Center. After you install Resilio Sync, you can tell it to synchronize all your files and folders to the cloud. This is automatic. Now, you can access these files and folders from any computer or device, just by opening the Sync Center. How is it different from the other apps out there? The main difference between Dropbox and Resilio Sync is that you can easily

integrate both services together to make your life even easier. As you can probably tell by now, Resilio Sync is far superior in functionality than Dropbox and other cloud-based sync services. Resilio Sync syncs and keeps files and folders in sync with ease, it's easy to use, and it's probably the most intuitive service

Keymacro is a very powerful macro recording software for Windows users. You can record the keyboard shortcuts (keystrokes) in the mouse, which can be very useful if you often need to perform the same action on the same programs or web pages. With Keymacro, it is possible to create as many macros as you want and automate the tasks you perform

on a daily basis. It is an easy way to assign a shortcut to perform a very long task that would be difficult to execute with only one click. Features: * Start the application: With Keymacro you can record keystrokes from Windows logon screen or any other application with which you want to record your actions. Just press the Start button. * Record your keystrokes: To record keystrokes, you

have to press the CMD (Windows), CTRL (Windows) or CAPS LOCK (Windows) buttons and then press a key. You can record the keyboard shortcuts in the mouse (or any program) you want to execute, it's up to you. You can press the Windows, the CTRL or the CAPS LOCK button to record the action. You can customize the hot keys you want to use for recording the macros (each of

them records different information). You can use the last 10 keystrokes as a macro, the ones you use the most are listed first. It is possible to create as many hot keys as you want. * Click: When you press a hot key, it will assign a click to a shortcut (hot key). If you want to repeat the same click several times, you can add them in the macro. * Use the clipboard: With hot keys you can copy text from the

applications you want to record your clicks. * List and remove: If you make a mistake when creating a hot key, it is possible to remove the hot key by pressing the X button. You can list the hot keys (pressed) and remove the ones you do not want to use. * Create an event: With keymacro you can create an event. This is useful if you want to start an application with a hot key, to click on an option in a dialog

box. * History: You can save your macros and edit them later. * Set a button: You can set a button to execute a hot key. The button can be anything: just a picture or a link. * Export: You can export your macros to the CSV file format. * The

theungsi It is a software that we use to sync files between computers and smartphones. Do Not Buy By Wysder The file sync system itself has been very effective and the features of the app are very straightforward. However, I am disappointed that I could not find a way to contact the developers. The store does not offer any other contact information than "email at resiliosync.com". I tried to

email the email address from the store but never received any answer. ... Review Resilio Sync By hdawg Sometimes when I sync, my NAS syncs my folders but not the folder I just created! So the folders are not the same. What a great software to use for a file transfer, it works, simple, I have a few pc and a android phone. It does not use any cloud servers but it works perfectly. If I will

get some time I will try to create an office sharing sync. Review Resilio Sync By Richard Semat A really nice product for a one time use, fast and easy to use.
